Fence Coupler HD Gripper

Specification Sheet

SPC-TEMP-007A

Unyielding Connection, Maximum Perimeter Security!

The Fence Coupler HD Gripper delivers a locked, rigid, and completely tamper-resistant hold with rapid deployment. Made with heavy-gauge carbon steel, this essential connection clamp offers exceptional structural stability across demanding job sites without slipping or bending under heavy physical impact.

The high-torque, single-bolt design minimizes the risk of forced entry and unauthorized disassembly while eliminating vulnerable gaps between panel frames—ideal for high-security construction sites, industrial yards, and active public events.

Featuring internal serrated gripping teeth that firmly bite into tubular steel legs, this heavy-duty fastener easily adapts to any temporary site boundary to ensure your perimeter line stays perfectly straight, structurally sound, and secure against severe weather conditions.

Key Features

- Anti-Slip Gripping Teeth
  (Internal serrated teeth bite securely into tubular steel frame)
- Carbon Steel Construction
  (Resists bending, twisting and physical impacts)
- Corrosion Resistance
  (Hot-Dip galvanized to protect against rust & weather)
- High-Torque Fastening System
  (Single bolt and nut assembly for reliable tightening)
- Anti-Tamper Security Joint
  (Locks adjacent panels together for a secure perimeter)

Suitable For

- Construction & Renovation Sites
- Public Events & Festivals
- Industrial Yards & Warehouses
- Roadwork & Infrastructure Projects
- Emergency Response & Disaster Relief
