

FIRST FENCE USA

WE LISTEN. WE CARE. WE DELIVER

PRODUCT GUIDE

WWW.FIRSTFENCEUSA.COM

ISSUE 2

Welcome to First Fence USA!

We are delighted to introduce ourselves.

Since our humble beginnings in the UK, we've quickly become the United Kingdom's most trusted 'they have it in stock' family run fencing and gate supplier.

We believe that securing your property should be a straight forward and positive experience. Choosing a fence shouldn't just be about picking something out of a catalog; it is an investment you need to experience firsthand, something designed to endure on your property or your customer's property for years to come.

That's why we focus on two simple commitments: providing strong, reliable fencing and gate solutions, and standing behind our work with honest, expert service. Those two values are the foundation of our success in the UK and what we bring to Texas.

We maintain a massive in-stock inventory, including ornamental galvanized fencing and gates, wood fencing, chain-link rolls, and all the necessary hardware.

Because we ship directly from our warehouse, you're never left waiting. Whether you're sourcing materials for a major commercial project or simply securing a residential yard, we hope this catalog demonstrates exactly how we can support you.

We look forward to working with you!

Vinny Kotecha & Dave Kotecha

WE LISTEN. WE CARE. WE DELIVER

The First Fence USA Difference

**TEXAN SERVICE.
PROMISED.**

True power requires deep roots. When the pressure hits, you need an ally who knows the terrain.

THE ULTIMATE INDOOR SHOWROOM

Shop one of America's largest indoor fencing showrooms, and select premium perimeter solutions.

INDUSTRY LEADING

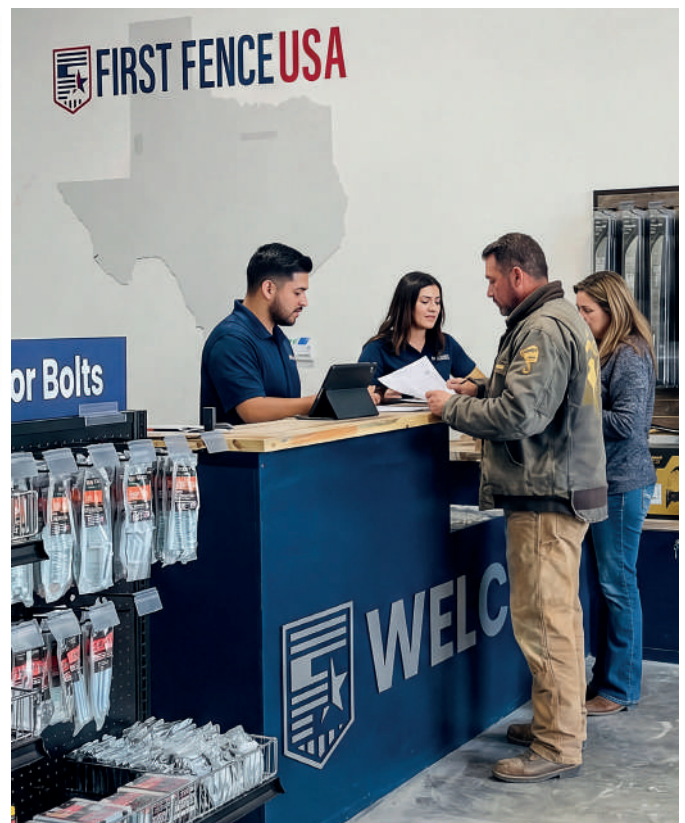

Get your materials and hit the site before the competition.

MASSIVE ON-GROUND INVENTORY

If you need it, our huge in-stock inventory means it's in the yard and ready to roll.

PRO-GRADE CREDIT TERMS

Partner with a dedicated account manager for rock-solid, transparent pricing.

Same Day & Next Day Delivery. Covered.

Don't let a tight schedule derail your project.

At First Fence USA, we understand that you can't always break away to haul materials. That's why our Kennedale-based flatbed fleet is always primed for rapid response.

With same-day and next-day delivery options, we ensure your materials arrive exactly when you need them.

Please Note that Gate Hardware is sold separately. All images provided in the catalog are for illustration purposes and may differ from actual products.

Ornamental Iron

Residential Fencing

Our Ornamental Steel Series is engineered for the property or business owner who demands maximum structural integrity without compromising visual appeal.

Forged from high-strength, galvanized steel and further protected by a powder coating, these panels are designed to withstand the rigors of high-traffic environments while maintaining a prestigious aesthetic for many years.

Key Features

- ★ Robust Gauge Engineering
- ★ Versatile Site Adaptability
- ★ Precision Welded Construction
- ★ Scalable Security Profiles
- ★ Specialized Commercial Reinforcement

ROBUST GAUGE ENGINEERING

Heavy-duty steel construction provides superior strength

VERSATILE SITE ADAPTABILITY

Rackable 3-Rail designs allow for installation on uneven terrain

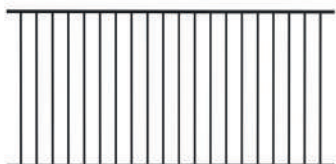

PRECISION WELDED CONSTRUCTION

Fully welded frame prevents rattling, sagging, & wind movement

SCALABLE SECURITY PROFILES

Multiple top styles for scalable security and a modern style

SUITABLE FOR

- ✓ Estate Security
- ✓ Residential
- ✓ Public Parks
- ✓ Historical Districts
- ✓ Commercial & Industrial

Commercial steel fencing delivers a robust and professional perimeter solution for commercial, public, and mixed-use environments.

Designed to perform reliably in demanding conditions, steel fencing is commonly specified for sites where durability, security, and a clean appearance are essential.

Manufactured from steel and engineered for outdoor performance, commercial steel fencing is built to withstand higher levels of use and environmental exposure.

Protective finishes help reduce corrosion and maintenance requirements, supporting long-term performance across busy sites.

Ornamental Iron Fencing Posts

Elevate the structural foundation of your perimeter with our versatile series of Residential and Commercial Fence Posts.

Designed to provide a rigid, long-lasting backbone for any fencing project, these posts are engineered to withstand environmental stressors while maintaining a clean, professional profile.

Available in both Dig-In configurations for traditional subterranean anchoring and Flanged Post (Bolt Down) options for secure mounting on concrete surfaces, our post systems cater to a wide range of installation requirements across 46", 58", and 70" heights.

Difference between Dig In and Flanged Posts

All galvanized ornamental posts are flat faced, allowing for any brackets at any direction

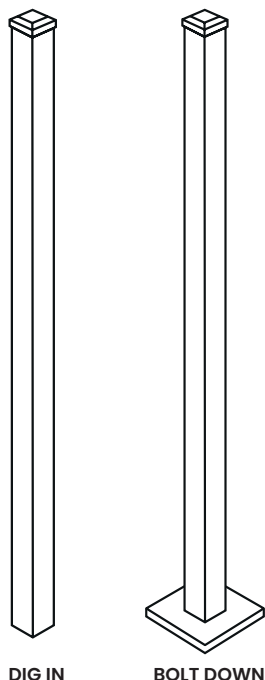

There are two post types available;

Dig In

These are designed to be buried in the ground, and rely on the depth of the hole and the surrounding material for stability.

Bolt Down

These feature a flat metal plate that has been welded to the bottom. The plate has pre-drilled holes for bolts.

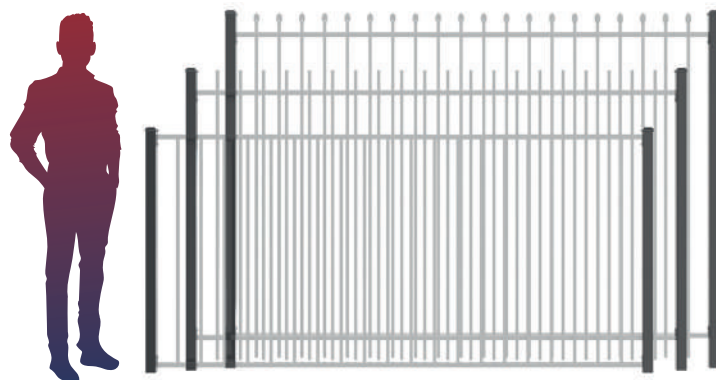

DIG IN

BOLT DOWN

Residential				
SKU	Description	Fence Height (Feet/Inch)	Width / Gauge	Total Height
001-000049	Dig In Post	4' (46")	2" x 2" x 16 ga.	6' (72")
001-000050	Dig In Post	5' (58")	2" x 2" x 16 ga.	7' (84")
001-000051	Dig In Post	6' (70")	2" x 2" x 16 ga.	8' (96")
001-000052	Bolt Down Post	4' (46")	2" x 2" x 16 ga.	4' (48")
001-000053	Bolt Down Post	5' (58")	2" x 2" x 16 ga.	5' (60")
001-000054	Bolt Down Post	6' (70")	2" x 2" x 16 ga.	6' (72")

Commercial				
SKU	Description	Fence Height (Feet/Inch)	Width / Gauge	Total Height
001-000055	Dig In Post	4' (46")	2.5" x 2.5" x 14 ga.	6' (72")

Our Commercial Steel Walk Gates provide a robust, professional access solution for high-traffic environments.

Engineered for strength and frequent use, these gates offer reliable pedestrian control without compromising site aesthetics.

The durable steel construction ensures long-term performance in demanding areas, while protective finishes minimize maintenance. Additionally, the ornamental open design maintains site visibility to support safety and awareness.

Key Features

- ★ Multi-Height Compatibility
- ★ Dual-Grade Durability
- ★ Professional Appearance
- ★ Reliable Access Control
- ★ Low Maintenance

SUITABLE FOR

- ✓ Estate Security
- ✓ Residential
- ✓ Public Parks
- ✓ Historical Districts
- ✓ Commercial & Industrial

! Our residential gates use a 1-1/2" square frame with 5/8" pickets, our commercial range features a 2" frame with 3/4" pickets

DID YOU KNOW?

A drive gate kit consists of two leaves rather than one. Both leaves are identical, it's the hardware kit that's different, see hardware on [Page 11](#).

Our Ornamental Galvanized Commercial Drive Gates provide a robust, professional access solution for high-traffic environments.

Engineered for frequent use at offices, schools, and retail sites, these gates offer industrial strength without compromising the property's aesthetic.

Manufactured from high-grade galvanized steel, these gates are built to withstand demanding conditions while reducing long-term maintenance. The ornamental open-picket design ensures clear visibility for site safety while maintaining a sophisticated, welcoming appearance.

Key Features:

- ★ Multi-Height Compatibility
- ★ Dual-Grade Durability
- ★ Professional Appearance
- ★ Reliable Access Control
- ★ Low Maintenance

Our residential gates use a 1-1/2" square frame with 5/8" pickets, our commercial range features a 2" frame with 3/4" pickets.

Ornamental Iron Swing Drive Gates

Make a Grand Entrance with the OldStead™ Drive Gate Collection

Elevate your property's curb appeal and secure your perimeter with the OldStead Drive Gate range by First Fence USA. Designed as a single-leaf solution, these gates stretch seamlessly across your entire driveway span. This creates a clean, uninterrupted visual profile and eliminates the need for center drop rods, making access to your property smoother and more elegant.

Whether you are securing a family home, protecting pets, or outfitting a commercial facility, the OldStead collection delivers uncompromising strength and tailored style.

SINGLE-LEAF CONVENIENCE

A single, sweeping gate means fewer moving parts, easier automation, and a cleaner aesthetic for your driveway entrance.

TAILORED STRENGTH

From standard 1-1/2" rails for home use to beefy 2" rails for commercial lots and ultra-wide spans, you get exactly the durability your project requires.

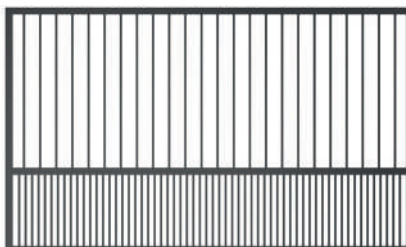

UNMATCHED VERSATILITY

With heights ranging from 4 to 6 feet and widths spanning from 8 to 12 feet, there is an OldStead gate purpose-built for every driveway.

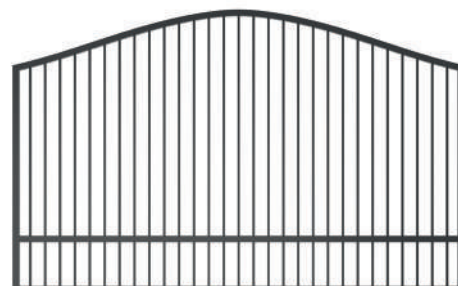

Flat Top

The Flat Top gate offers a sleek, modern aesthetic perfect for everyday residential security. Available in 4-foot, 5-foot, and 6-foot heights, it seamlessly matches your existing landscape. Engineered for standard 8-foot driveway spans, this style provides a crisp, contemporary boundary without sacrificing durability.

Pet Barrier

Designed with your pets in mind, the Pet Barrier gate keeps animals safely contained while securing wider residential driveways. Standing 6 feet tall, these specialty gates easily accommodate 10-foot and 12-foot openings. Built with heavy-duty 2-inch rails to handle the wider span, they deliver maximum structural integrity and complete peace of mind.

Arch Top

Make a grand statement at your property's entrance with the dignified Arch Top gate. Engineered for heavy-duty commercial use or large estates, this style handles high-traffic environments while maintaining an elegant profile. Standing 6 feet tall and spanning impressive 10-foot and 12-foot widths, it provides top-tier security and a highly professional finish.

Ornamental gate hardware ensures the smooth operation, security, and longevity of your gate system.

Designed for both pedestrian and vehicle access, these essential components keep gates aligned and functioning reliably in any environment.

Built for durability and weather resistance, our hardware features protective finishes to minimize maintenance and prevent corrosion. Whether for residential or commercial use, the right hardware is vital for consistent, long-term performance.

Key Features:

- ★ Smooth & Reliable Gate Operation
- ★ Durable Construction
- ★ Compatibility with Ornamental Gate Systems
- ★ Secure Closure for Controlled Access
- ★ Support for Correct Gate Alignment and Stability

Signature Residential & Commercial Walk Gate Hardware Kit

Essential Residential & Commercial Hinge & Latch Sets

Our residential gates use a 1-1/2" square frame with 5/8" pickets, our commercial range features a 2" frame with 3/4" pickets.

Single Gate Leaf Hinge and Latch Set

This all-in-one kit offers heavy-duty reliability and a clean, professional look. Ideal for both residential and commercial high-traffic entry points.

Double Gate Leaf Hinge and Latch Set

This heavy-duty kit provides the extra strength and synchronized closing power needed for wide-access residential or commercial entrances.

With padlock installed

Without padlock installed

Residential Walk Gate Hardware Kit

Tailored for high-end fencing, it blends sleek aesthetics with the rugged durability needed.

Residential Drive Gate Hardware Kit

Providing heavy-duty support and sophisticated design for larger designs.

Commercial Walk Gate Hardware Kit

This hardware ensures structural strength and smooth operation for high-traffic gates.

Commercial Drive Gate Hardware Kit

This heavy-duty kit handles the weight and wind loads of large-scale commercial gates.

002-000007	3 Rail Flat Top	5/8" x 5/8" picket-18 ga.	1" x 1" rail-16 ga.	6' (72")	4-1/2' (54")
002-000008	3 Rail Flat Top	5/8" x 5/8" picket-18 ga.	1" x 1" rail-16 ga.	6' (72")	5' (60")

Commercial aluminum fencing provides a durable, low-maintenance perimeter for retail, office, and public spaces.

Naturally corrosion-resistant and finished for high-traffic use, it offers a professional aesthetic that withstands harsh weather without the upkeep of traditional materials.

Its lightweight design ensures easy installation, while the open-picket layout maintains site visibility and safety.

Key Features:

- ★ Professional Appearance for Commercial Sites
- ★ Clear Boundary Definition
- ★ Reliable Long-Term Performance
- ★ Corrosion-Resistant Aluminum Construction
- ★ Low Maintenance

SUITABLE FOR

- ✓ High-Volume Parking Access
- ✓ Industrial & Warehouse Perimeters
- ✓ Corporate Campus Entrances
- ✓ Multi-Family & HOA Communities
- ✓ Secured Logistics & Fleet Yards
- ✓ Educational & Municipal Facilities
- ✓ Retail & Hospitality Boundaries
- ✓ Restricted Utility & Data Sites

COMMERCIAL-GRADE LONGEVITY

High-strength aluminum alloy ensures superior integrity and a polished, corrosion-free professional appearance.

SECURITY-ENHANCED PICKETS

Reinforced 16-gauge 3/4" pickets provide exceptional defense against impact and forced entry to secure business assets.

TAMPER-RESISTANT WELDED CONSTRUCTION

Fully welded construction delivers maximum stability and tamper resistance to withstand rigorous daily use.

Experience the perfect synthesis of security and curb appeal. Our Residential Aluminum Gate Series is engineered for the American homeowner who demands strength without sacrificing style.

Constructed from premium aluminum alloy with a weather-resistant powder-coated finish, these gates are designed to look brand new for decades.

Aluminum gates are available in a range of decorative styles that complement both traditional and modern homes. They are also valued for their ease of use; their lighter weight supports smooth operation and reduces strain on hinges and hardware, contributing to consistent performance over time.

Key Features

- ★ Built to Last
- ★ Impact-Resistant Pickets
- ★ Anti-Sag Engineering
- ★ Solid Welded Construction
- ★ Versatile Installation

Residential aluminum gates provide a lightweight, corrosion-resistant access solution designed for homes and residential properties.

Combining durability with low maintenance requirements, aluminum gates are ideal for homeowners seeking long-term performance with a clean and decorative appearance.

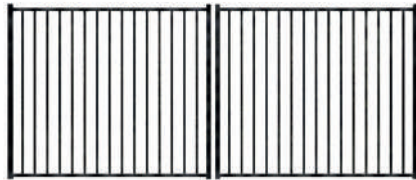

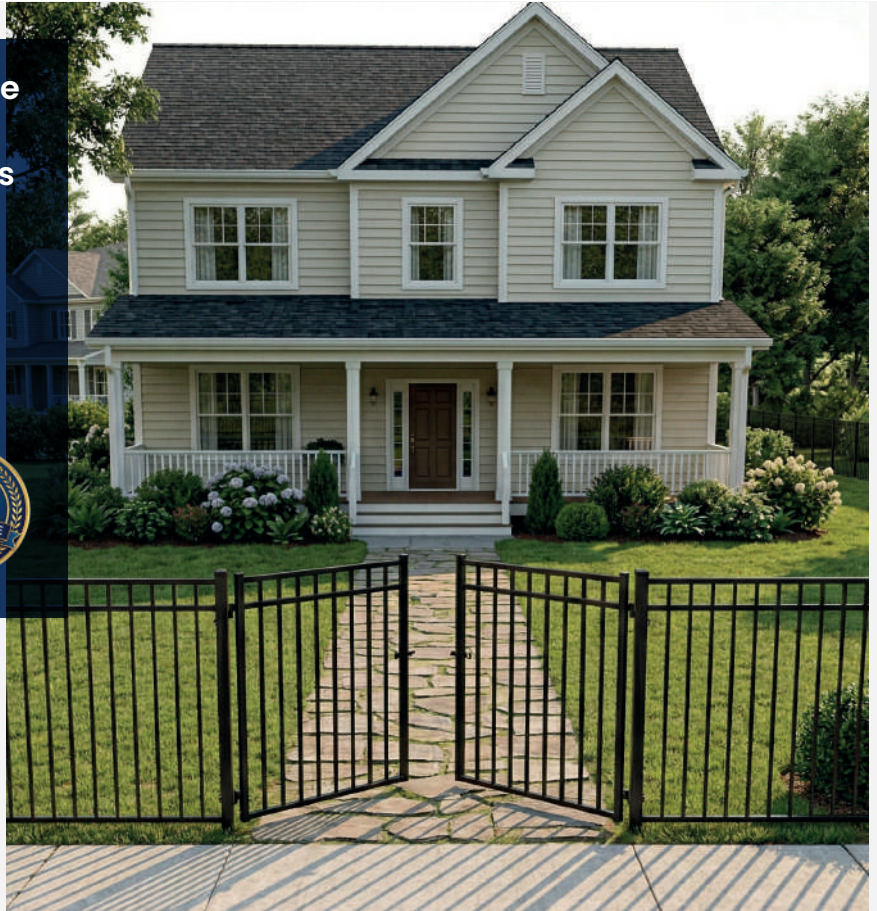

Key Features

- ★ Decorative Designs Suited for Residential Settings
- ★ Compatibility with Ornamental Fencing Systems
- ★ Excellent Resistance to Rust & Corrosion
- ★ Lightweight Construction
- ★ Low-Maintenance

SUITABLE FOR

- ✓ Coastal & Lakefront Properties
- ✓ Garden & Landscape Accents
- ✓ Rolling Perimeter Fencing
- ✓ Front Yard Definition
- ✓ Patio & Courtyard Privacy
- ✓ Poolside Enclosures

Ornamental Aluminum Gates

Commercial Double Drive Gates

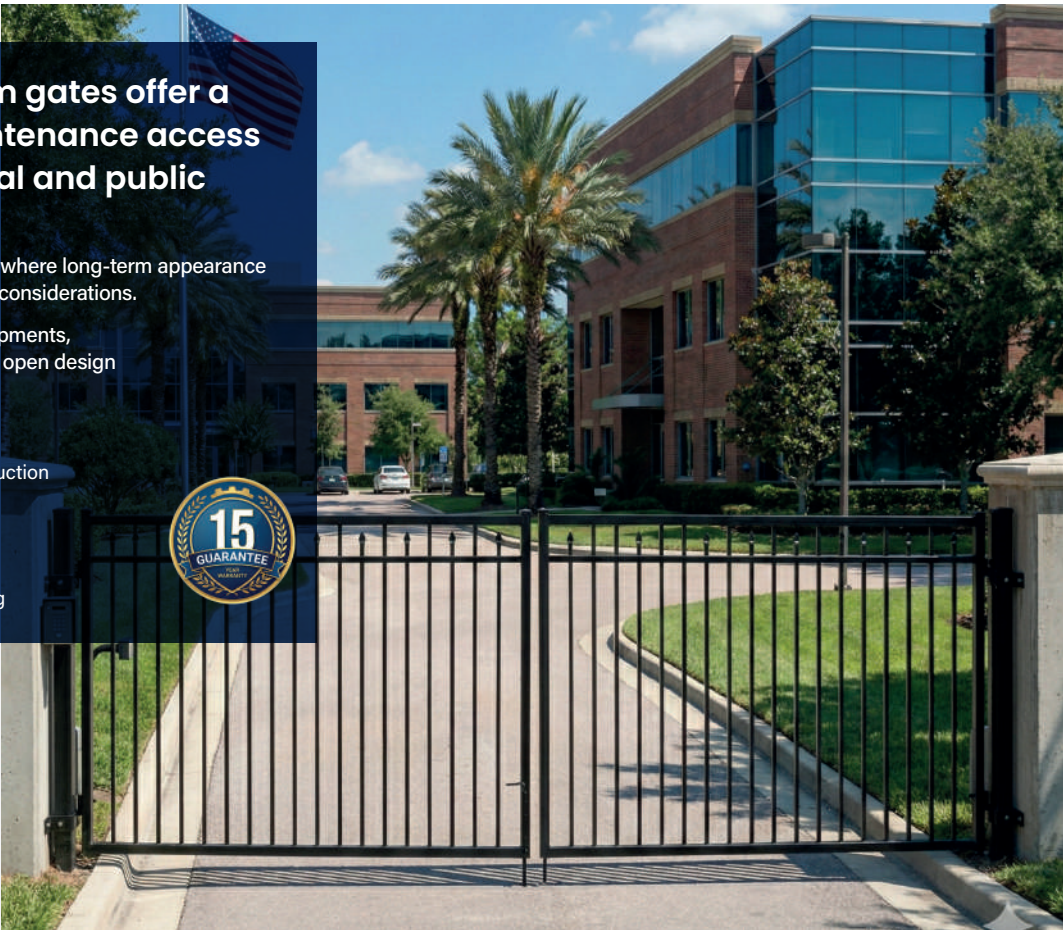

Commercial aluminum gates offer a durable and low-maintenance access solution for commercial and public environments.

Aluminum gates are well suited to sites where long-term appearance and corrosion resistance are important considerations.

Commonly used at offices, retail developments, schools, and recreational facilities, their open design supports visibility and site awareness.

Key Features

- ★ Corrosion-Resistant Aluminum Construction
- ★ Low-Maintenance Performance
- ★ Professional Appearance
- ★ Smooth Operation
- ★ Compatibility with Ornamental Fencing

DON'T FORGET...

To take a look at our matching gate hardware on **Page 20**.

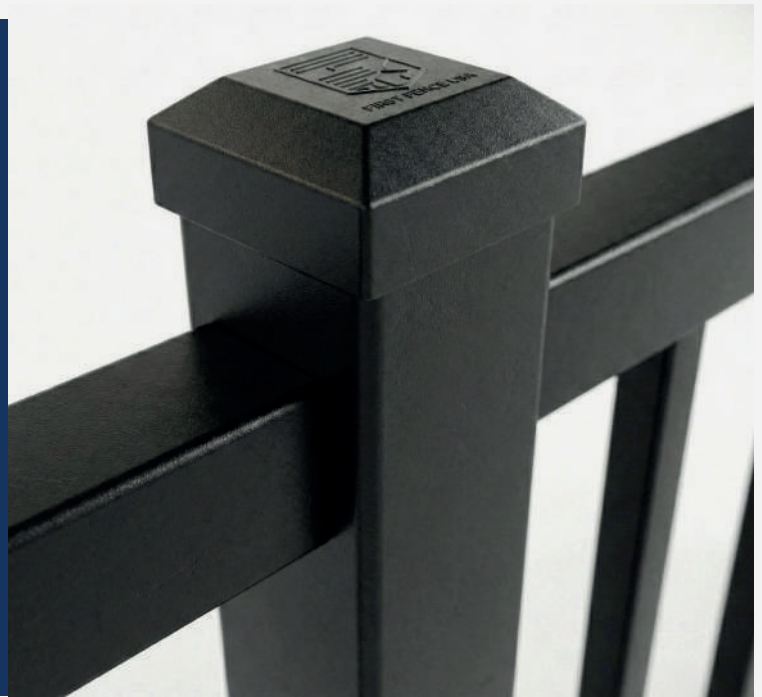

Ornamental aluminum posts offer a lightweight, durable, and rust-proof foundation for residential and commercial fencing.

Engineered for long-term performance with minimal upkeep, these posts provide reliable structural support while maintaining a clean, professional appearance in any environment.

Naturally corrosion-resistant, they are the ideal choice for high-moisture areas where traditional materials might fail. When paired with matching panels and gates, they create a cohesive, high-end perimeter that complements both modern and classic architecture.

Key Features:

- ★ Lightweight Construction
- ★ Excellent Corrosion Resistance
- ★ Low-Maintenance Performance
- ★ Consistent Alignment
- ★ System Compatibility

GALVANIZED POSTS

First Fence residential posts are flat faced, allowing for any brackets at any direction.

FENCE PANEL RAILS INSERT INTO SLOTS

Once inserted, the rails are locked firmly in place with self-drilling screws, ensuring a secure perimeter.

Ornamental Aluminum Gates

Gate Hardware

Ornamental gate hardware ensures the smooth operation, security, and longevity of your gate system.

Designed for both pedestrian and vehicle access, these essential components keep gates aligned and functioning reliably in any environment.

Built for durability and weather resistance, our hardware features protective finishes to minimize maintenance and prevent corrosion. Whether for residential or commercial use, the right hardware is vital for consistent, long-term performance.

Key Features:

- ★ Smooth & Reliable Gate Operation
- ★ Durable Construction
- ★ Compatibility with Ornamental Gate Systems
- ★ Secure Closure for Controlled Access
- ★ Support for Correct Gate Alignment and Stability

Essential Residential & Commercial Single Gate Leaf Hinge and Latch Set

Chain link fencing is a widely used perimeter solution valued for its durability, versatility, and cost-effectiveness.

Commonly installed across residential, commercial, and industrial environments, chain link fencing provides clear boundary definition and reliable site security while maintaining visibility through the fence line.

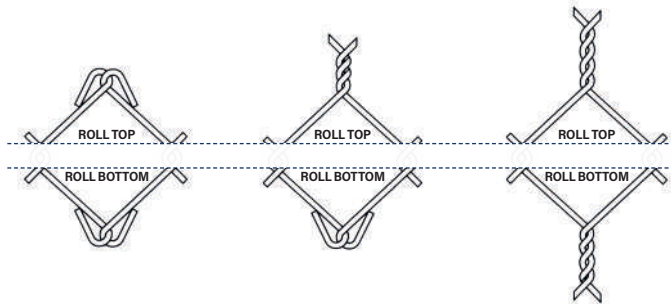

Features

- ★ Cost-Effective
- ★ Durable Construction
- ★ High-Visibility
- ★ Adaptable Systems
- ★ Low Maintenance

Finishes Available

Difference between Knuckle Knuckle, Knuckle Twist and Twist Twist.

(KK) Knuckle Knuckle (KT) Knuckle Twist (TT) Twist Twist

The wire ends at both the top and bottom of the fence are bent over into smooth loops.

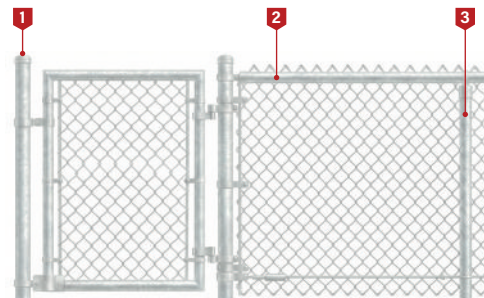

Hybrid finish where one end is bent into smooth loops and the other, sharp barbs.

The wires at both ends are twisted into sharp barbs to make it difficult to climb or crawl under.

Chain Link Tube & Pipe

For a strong, professional finish, chain link fences rely on three essential structural elements to ensure stability and long-term durability.

1. Terminal Posts

Acts as a heavy-duty anchor for corners, ends and gates.

2. Top Rails

Connect line posts to prevent sagging.

3. Line Posts

Designed to serve as the vertical backbone.

Chain link components are the essential building blocks that support the structure, stability, and long-term performance of chain link fencing and gate systems.

While fencing panels and gates form the visible perimeter, it is the individual components that ensure the system is installed correctly, remains securely tensioned, and performs reliably over time across residential, commercial, and industrial environments.

Chain Link Fencing

Barbed Arms & Tension Bars

Barbed arms are essential security components that mount to fence posts to support overhead barbed wire.

By extending strands upward or outward, they create a formidable climbing deterrent for commercial and industrial sites.

Tension bars are vital for securing chain link mesh to terminal posts. Threaded through the fabric and secured with tension bands, they maintain the alignment and tautness necessary for a professional, stable fence.

Designed to blend perfectly with your fencing system, walk gates provide essential foot access for residential, commercial, and industrial properties.

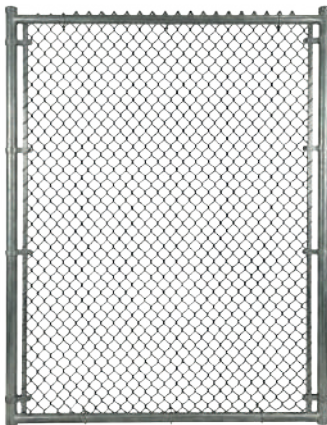

They are engineered to maintain perimeter security while allowing for smooth, frequent entry and exit.

Benefits of Walk Gates

- ★ Controlled Pedestrian Access
- ★ Durable Construction
- ★ Easy Integration with Chain Link Fencing Systems
- ★ Clear Visibility
- ★ Low Maintenance

DID YOU KNOW

Chain link walk gates are suitable for both permanent and temporary installations.

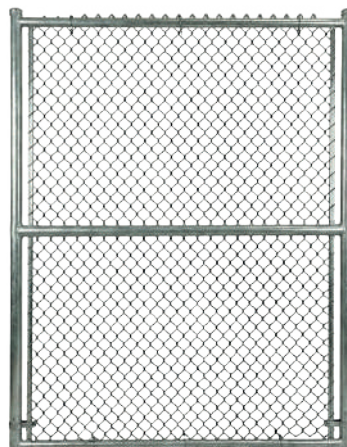

Residential Walk Gate

SKU: 004-000117

The Residential Walk Gate is the perfect solution for homeowners requiring wider access to their property.

This gate easily accommodates ride-on mowers, large garden carts, and double strollers.

Commercial Walk Gate

SKU: 004-000129

The Commercial Walk Gate offers robust entry solution for commercial properties, often used for schools, sports complexes and businesses that require a higher level of deterrence.

Chain Link Gates

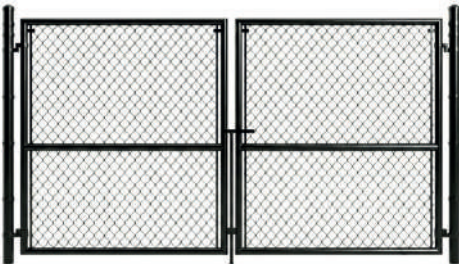

Double Drive Gates

Engineered for heavy-duty performance, drive gates provide a practical solution for controlling vehicle entry and exit across driveways, service roads, and industrial access points.

Unlike smaller walk gates, these systems are built to handle wider spans while maintaining structural alignment.

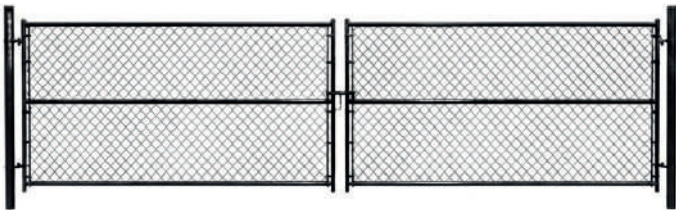

Benefits of Drive Gates

- ★ Controlled Vehicle Access
- ★ Durable Construction
- ★ Clear Visibility
- ★ Adaptable Installation
- ★ Low Maintenance

Chain link gate hardware provides the essential components required to ensure chain link gates operate smoothly, securely, and reliably over time.

Designed specifically for use with chain link fencing systems, this hardware supports correct gate alignment, controlled movement, and dependable closure across residential, commercial, and industrial environments.

Chain Link Gates

Sliding Drive Gates

Rolling slide gates provide an efficient and space-saving access solution for sites where swing clearance is limited or controlled vehicle movement is required.

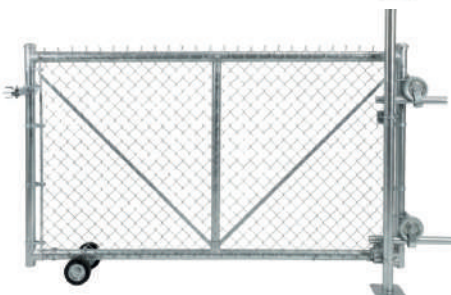

Sliding gates operate by moving horizontally along the fence line. This design allows vehicle access to be managed efficiently in locations where space in front of or behind the gate is restricted.

There is also matching rolling slide gate hardware to provide a full gate system.

Our Full Privacy Vinyl Series is engineered for property owners demanding absolute seclusion and a clean, classic aesthetic.

Unlike traditional wood fencing, this system utilizes high-grade, UV-stabilized vinyl construction to create a seamless, solid barrier that resists weathering, fading, and rot.

There is an option to have a decorative lattice panel, to combine style and strength.

Key Features

- ★ Premium Vinyl Material
- ★ Total Privacy
- ★ Structural Rigidity
- ★ Versatile Heights
- ★ Modular Design

SUITABLE FOR

- ✓ Residential & HOA Perimeters
- ✓ Pool Enclosures
- ✓ Dumpster & Utility Screening
- ✓ Hospitality Courtyards

Vinyl Fencing

Closed Picket Fence

The picket ranges are ideal for homeowners who demand the perfect balance of security and airflow. Featuring a contemporary vertical picket design, there is both a closed top rail and an open-top rail option to choose from.

This system utilizes high-grade, UV-stabilized vinyl to create a pristine, maintenance-free finish that is built to withstand the elements for decades.

Key Features

- ★ Premium Vinyl Material
- ★ Class Picket Aesthetics
- ★ Engineered Structural Rigidity
- ★ Streamlined Modular Design
- ★ Balanced Privacy & Airflow

Vinyl Fencing

Semi Privacy Fence

Featuring a contemporary horizontal slat design, this fencing offers a balanced perimeter that provides partial visual screening while maintaining openness and airflow.

It is commonly used in residential and mixed-use environments where both privacy and visibility are important considerations.

Key Features

- ★ Premium Vinyl Material
- ★ Balanced Privacy & Airflow
- ★ Engineered Structural Rigidity
- ★ Streamlined Modular Design

SUITABLE FOR

- ✓ Residential & HOA Perimeters
- ✓ Pool Enclosures
- ✓ Dumpster & Utility Screening
- ✓ Schools & Day-care Facilities
- ✓ Hospitality Courtyards

Vinyl Semi Privacy Fence Panel

BALANCED PRIVACY & AIRFLOW

The horizontal interlocking slats provide a high-seclusion barrier while allowing for natural breeze and light.

This design reduces wind load on the structure without compromising your backyard's security.

STREAMLINED MODULAR DESIGN

A full range of matching 5-inch posts ensures a seamless, professional look for any yard layout, whether you're navigating corners or ending a run.

ENGINEERED STRUCTURAL RIGIDITY

A reinforced 5-inch profile prevents sagging at the full 6-foot height. This heavy-duty construction is built to withstand high wind speeds and impact far better than standard retail kits.

PREMIUM VINYL MATERIAL

Our high-grade, UV-stabilized PVC prevents yellowing and brittleness. This maintenance-free system requires no painting, staining, or sealing to stay looking brand new.

NewStead Wood Plastic Composite (WPC) fencing blends the natural warmth of wood with the high-performance durability of modern engineering.

Crafted from a mix of recycled plastic and bamboo fibers, these panels provide a heavy-duty, eco-friendly, and stylish solution for any outdoor space.

It is the perfect choice for both residential and commercial projects, offering an attractive, long-lasting barrier without the constant upkeep of traditional wood.

Wood Plastic Composite Decking

Transform your outdoor living space with NewStead Wood Plastic Composite (WPC) Decking, the premier, low-maintenance, and eco-friendly alternative to traditional lumber.

By engineering a high-performance hybrid material that fuses the warmth of natural wood with the rugged resilience of recycled plastic and bamboo, NewStead delivers a sophisticated aesthetic designed to withstand the elements without the constant upkeep.

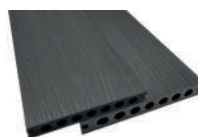

System Components:

- ✓ Decking Boards
- ✓ Deck Trim
- ✓ Flat Fascia Boards

There is also a complete range of hardware available including, starter clips, joining clips and specialized end joining clips.

Mesh fencing provides a strong and versatile perimeter solution designed to deliver clear boundary definition while maintaining visibility across the fence line.

Commonly used in residential, commercial, industrial and public environments, mesh fencing offers a balance between security, openness and long-term performance.

Its clean and functional design makes it suitable for sites where safety and supervision are important without the need for a solid barrier.

SUITABLE FOR

- ✓ Residential & HOA Perimeters
- ✓ Pool Enclosures
- ✓ Dumpster & Utility Screening
- ✓ Schools & Day-care Facilities
- ✓ Hospitality Courtyards
- ✓ Pickleball and Tennis Courts

TAKE A LOOK
at our matching gates and gate hardware on [Pages 36-38](#).

Mesh Types

3D Mesh Fencing

BUILT TOUGH

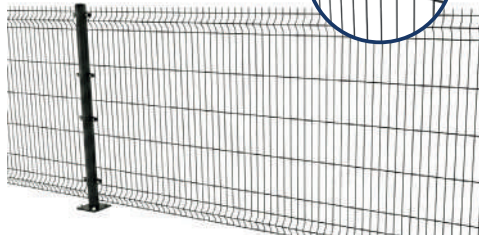

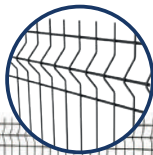

Galvanized 6/6 gauge steel with a rust-proof powder coat.

SMART DESIGN

Distinctive V-shaped bends add structural rigidity and a sleek appearance.

CLEAR SECURITY

The 2" x 8" mesh ensures high visibility for security monitoring.

Twin Wire Mesh Fencing

ROBUST BUILD

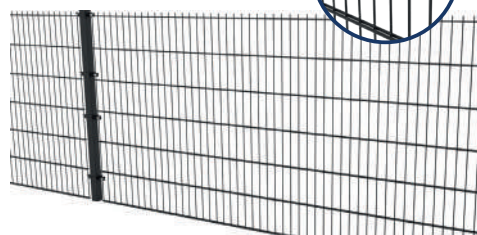

Two 4 GA horizontal wires and one 6 GA vertical wire provide reliable strength.

BUDGET FRIENDLY

An affordable, easy-to-install fencing solution that is perfect for residential areas.

CLEAR SECURITY

Enhances perimeter security for sensitive sites

Anti-Climb Mesh Fencing

ULTIMATE SECURITY

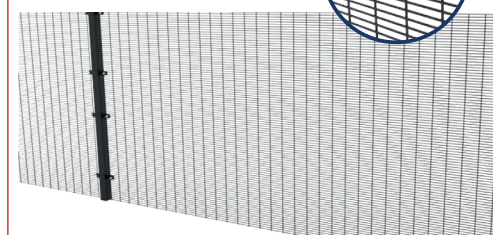

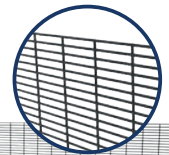

Often known as "prison mesh," it delivers exceptional, high-level perimeter protection.

SOLID CORE

Built with robust 8 gauge (4 mm) wire to resist heavy impact and standard cutting tools.

ANTI-CLIMB APERTURE

The tight 3" x 0.5" mesh opening of the 358 design eliminates finger holds to completely prevent scaling.

Welded Wire Fencing Brackets

Mesh posts provide the primary vertical support for welded mesh fencing systems, ensuring stability, alignment, and structural integrity across the perimeter.

Designed to work in conjunction with mesh fencing panels, mesh posts form a secure and continuous fence line suitable for a wide range of applications. Correctly specified posts are essential to the overall performance and durability of mesh fencing installations.

Key Features:

- ★ Strong Vertical Support for Mesh Fencing Systems
- ★ Improved Alignment and Perimeter Stability
- ★ Reliable Performance in Outdoor Environments
- ★ Compatibility with Welded Mesh Panels and Fixings
- ★ Suitable for Varied Site Layouts and Ground Conditions

Optimized for Efficient Installation and Structural Rigidity.

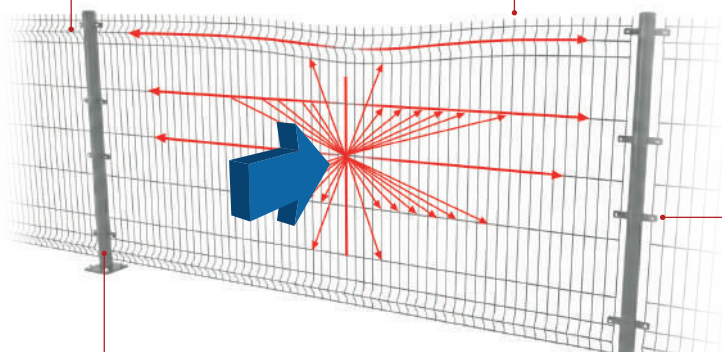

Far more than standard welded wire fencing, First Fence's 3D mesh range is precision-engineered for the real world. It strikes the perfect balance, offering effortless handling during installation without sacrificing the uncompromising rigidity your site demands, panel after panel.

RIGIDITY & STRENGTH

The V-Bend design absorbs and disperses shock, keeping the panel rigid and minimizing damage when hit.

ANTI-CLIMB

Discourage opportunistic climbing attempts on the 3D Mesh Fence with prominently placed 1-3/16" spike projections.

POSTS DESIGNED TO LAST

To maximize resistance to rust and corrosion, all First Fence USA 2-3/8" mesh fence posts are supplied undrilled.

BRACKETS TO SUIT

Ensure secure fixing with our range of heavy-duty clamp brackets. Suitable for intermediate line and terminal end posts, they include anti-shear nuts to prevent tampering.

Welded wire walk gates provide secure and controlled pedestrian access through welded wire fencing systems.

Integrated into welded wire fence lines, these gates create clearly defined entry points while maintaining the strength, visibility, and continuity of the surrounding perimeter.

They are suitable for sites where pedestrian movement must be managed safely and efficiently.

Key Features

- ★ Ability to Control Pedestrian Access
- ★ Clear Visibility
- ★ Reliable Performance
- ★ Compatible with Welded Mesh Fencing
- ★ Defined and Secure Entry Points

Available as Dig-in and Bolt down.

SLIDER MECHANISM

Modular slider kit allows for latching and locking.

HINGE POST
2-3/8" post designed for hanging gate leaf.

UNIVERSAL DROP ROD
Secure your gate with an optional auto locking drop rod, no modification required for installation. See [Page 53](#).

ADJUSTABLE HINGE
Allows gate adjustment

UNIVERSALLY HANDED

Choose your handing during installation: the non-handed leaf supports both inward and outward opening.

Our barbed wire brackets provide versatile, durable solutions for enhancing the height and security of mesh fencing.

When added to fence posts, they allow for the installation of barbed wire, acting as a robust bracket that adds an extra layer of security to your location.

They are available in three styles:

STRAIGHT EXTENSIONS

Offer a clean, vertical addition to fence posts, raising the fence height without altering the original structure.

CRANKED EXTENSIONS

Angle outward, providing an added deterrent by creating a barrier that's challenging to scale.

Y-SHAPED EXTENSIONS

Extend from the post in a dual outward shape, often used for installations needing barbed wire or extra wiring, effectively increasing both height and security coverage.

Can also be used with Barbed Wire

Also available in Y Shaped and Straight Fit Options

Palisade fencing is a high-security fencing solution designed to create strong, clearly defined perimeter boundaries.

Commonly used in security focused environments, it is recognized for its vertical pale design and rigid construction, which together provide a strong deterrent against unauthorized access.

Palisade fencing is suited to sites where durability, visibility and long-term performance are essential.

Key Features

- ★ Strong Physical and Visual Deterrence
- ★ Clear Visibility Along the Perimeter
- ★ Durable Performance in Outdoor Environments
- ★ System Compatibility between Pales, Rails and Posts
- ★ Suitable for High Security Commercial and Industrial Sites

Did you know our palisade fencing and gates can be installed at a gradient and on uneven terrain?

Wood fencing provides a traditional and versatile boundary solution valued for its natural appearance and adaptability across a wide range of outdoor environments.

Manufactured from carefully selected timber species and prepared for exterior use, wood fencing is designed to perform reliably in outdoor conditions.

There are three styles of wooden fencing, and various stain options so that you can select the right range for you.

Key Features

- ★ Natural and Traditional Appearance
- ★ Wide Variety of Fencing Styles
- ★ Adaptability to Different Layouts and Ground Conditions
- ★ Strong Structural Performance
- ★ Compatibility with Wood Posts, Gates and Hardware

Ensure your wood fencing projects stand the test of time with our durable, easy-to-install fittings and accessories.

From weather-resistant post caps to heavy-duty fasteners, our comprehensive hardware selection provides everything you need for a sturdy, professional-grade build.

Key Features

- ★ **SECURE PIPE FITTINGS:** Robust galvanized pipe grip adaptors designed for tight, reliable connections.
- ★ **PROTECTIVE POST CAPS:** 2-3/8" domed tube and flat caps that provide a clean, weather-resistant finish to your steel posts.
- ★ **HEAVY-DUTY SCREWS:** 1/4" galvanized lag screws, conveniently available in bulk boxes to handle large-scale jobs.
- ★ **VERSATILE COLLATED NAILS:** A wide array of ring-shank siding and framing nails available in multiple collation angles (0, 15, and 22 degrees).
- ★ **CORROSION-RESISTANT FINISHES:** Choose between hot-dipped and electro-galvanized nail options for long-lasting outdoor weather protection.

Wood fencing provides a traditional and versatile boundary solution valued for its natural appearance and adaptability across a wide range of outdoor environments.

Key Features

- ★ Natural and Traditional Appearance
- ★ Wide Variety of Fencing Styles
- ★ Adaptability to Different Layouts and Ground Conditions
- ★ Strong Structural Performance
- ★ Compatibility with Wood Posts, Gates and Hardware

Agricultural fencing solutions are designed to support effective land management, livestock control, and boundary definition across farms and rural environments.

Used to protect land, manage animals, and organize agricultural spaces, these systems provide practical and reliable perimeter solutions suited to everyday agricultural operations.

Key Features

- ★ Effective Livestock Control & Containment
- ★ Clear Boundary Definition across Land Areas
- ★ Reliable Performance in Outdoor Rural Environments
- ★ Flexible Solutions for Different Agricultural Needs
- ★ Compatibility with Wire, Netting and Post Systems

Temporary fencing is a versatile perimeter solution designed to provide short-term boundary control, site safety, and access management. It is commonly used where a secure enclosure is required for a limited period.

Designed for ease of deployment, temporary fencing systems offer a rapid and practical way of defining areas, restricting access, protecting people and equipment without permanent installation.

Key Features

- ★ Quick Installation and Removal
- ★ Flexible Configuration for Changing Site Layouts
- ★ Clear Boundary Definition and Access Control
- ★ Suitable for Short-Term and Temporary Use
- ★ Reusable Solution for Multiple Projects

Gate hardware provides the essential components required to ensure gates operate securely, smoothly and reliably across a wide range of fencing systems.

Designed for outdoor use, gate hardware is engineered to perform consistently in environments exposed to weather conditions, regular use, and mechanical stress.

These components can help maintain gate stability and ease of operation over time.

Available ranges are:

- ★ Locks & Latches
- ★ Handles
- ★ Hinges
- ★ Spring Closers
- ★ Bolts

FEATURES

- ✓ Pre-Galvanized Steel
- ✓ Compatible with a range of gates
- ✓ Multiple Sizes Available

These high-quality, solar-friendly automated gate openers are designed for residential, agricultural and light commercial applications.

They are the most efficient in the industry and require low power while still offering maximum performance. Engineered utilizing quality materials and components, they are able to deliver reliable, trouble-free operation for years.

In addition to gate operators / openers, the brand also offers a comprehensive range of access controls, replacement boards, actuators and components, and accessories and hardware.

Gate Operators / Openers

Primary drive systems for swing and slide gates.

Tools, Fasteners & Accessories

Poly Tarps

This heavy-duty tarpaulin provides vital weatherproofing for uninstalled lumber and shields client landscaping from dirt or concrete spills during installation.

Beyond standard site protection, it serves as an excellent temporary shield for sensitive building materials like cement bags, covers agricultural crops and livestock feed ranges, and functions as a durable ground liner for outdoor staging zones.

For use on farmlands

 **AVAILABLE IN
MULTIPLE SIZES**

 **ALL WEATHER RESISTANCE
AND PROTECTION**

Ideal for lumber cover

Temporary screening for fencing

Wood fasteners are essential hardware used to mechanically connect timber components.

Screws offer superior holding power and easy removal, nails provide quick installation and high shear strength for framing, and bolts secure heavy-duty load-bearing joints. Choosing the right fastener ensures structural integrity, prevents splitting, and guarantees the longevity of woodworking projects.

Heavy-Duty Concrete Wedge Anchors

The ultimate permanent hardware for securing bolt-down fence posts to solid concrete.

Designed for high-strength, permanent installations, these heavy-duty fasteners feature an expanding metal collar that wedges deep into concrete as tightened. The result is a rock-solid, friction-locked hold that keeps fence lines straight and wobble-free against heavy winds and impacts.

High-Performance Concrete Screw Anchors

The fast, reliable way to secure bolt-down fence posts without expansion stress.

A concrete screw anchor is a rugged, self-tapping fastener built for speed and strength. After drilling a pilot hole, you simply drive the screw straight through your post base and into the concrete. The hardened steel threads carve directly into the masonry, creating a powerful mechanical interlock. Because they don't expand, these anchors won't crack or burst your concrete—making them perfectly safe to use right near the edge of a slab. The result is a tough, vibration-resistant hold that can easily be backed out later if needed.

Cobra Wedge Anchors (Pack of 10)

Epoxy Adhesives & Adhesive Guns

Epoxy anchoring adhesives are powerful, two-part chemical systems that lock threaded rods, rebar, and dowels into concrete, masonry, or wood. By creating an incredibly strong bond, they handle massive loads and easily outperform traditional mechanical anchors in high-stress, heavy-vibration, or cracked conditions.

SKU	Brand	Adhesive Type	Suitable For	Size	Comes With
