Chain Link End Band

Specification Sheet

SPC-CHAIN-004A

Chain Link End Band

The Chain Link Fencing End Band is a critical hardware piece for stabilizing residential fence lines. Designed to fit terminal posts, this band serves as the anchor point for the chain link fence rail system. It connects the top and bottom rails to the end, corner, or gate posts via a rail end cup. This connection is vital for preventing the horizontal framework from sagging or detaching under pressure, ensuring the fence remains a reliable barrier for pets and children.

Key Features

☉ **Material Type**

Galvanized Steel

☉ **Compatibility**

The Chain Link Fencing End Band are used to connect the rail ends on the horizontal top and bottom rails to the terminal posts in a chain link fencing run.
