Chain Link Rail Sleeve

Specification Sheet

SPC-CHAIN-007A

Chain Link Rail Sleeve

The Chain Link Fencing Rail Sleeves are an essential component for constructing a sturdy and continuous top rail for your perimeter. Designed for both residential and commercial applications, this sleeve is used to join two top rails that do not feature swaged (tapered) ends. By sliding over the ends of two adjacent rails, it creates a bridge that maintains the alignment and rigidity of the chain link fence rail. This is particularly useful when using cut pieces of pipe or standard plain-end tubing to complete a fence line.

Key Features
