Chain Link Barbed Arm

Specification Sheet

SPC-CHAIN-011A

Chain Link Barbed Arm

The Chain Link Fencing Barbed Arms Three Strand are the standard solution for upgrading residential or light commercial fences into secure barriers. Designed to sit atop line posts, the arms feature a pass-through loop that accommodates a top rail, integrating seamlessly with the existing framework. This dual-function design secures the top rail while simultaneously supporting three strands of barbed wire, transforming a standard chain link fencing installation into a serious deterrent against trespassing and climbing.

Key Features
