# Galvanized Vertical Barbed Arm

## Specification Sheet

SPC-CHAIN-012A

### Galvanized Vertical Barbed Arm

The Chain Link Fencing Galvanized Vertical Barbed Arms Three Strand offer a specialized security solution for properties where space is limited or overhangs are restricted. Unlike traditional angled arms, these fittings extend straight up from line post, adding vertical height to the chain link fencing without projecting over property lines or adjacent pathways. It securely holds a top rail and supports three parallel strands of barbed wire, creating a taller, more imposing barrier that remains strictly within the fence's footprint.

### Key Features

☑ **Material Type**

Galvanized Steel

☑ **Compatibility**

The Chain Link Fencing Galvanized Corner Barbed Arms are used to sit on top of line posts with a loop allowing the top rail to pass through and to house 3 strands of barbed wire on a Chain Link Fencing system.

☑ **Sizes Available**

Sizing Matches Diameter of Line Post x Diameter of Top Rail
