# Chain Link Truss Rod Holder

## Specification Sheet

SPC-CHAIN-017A

### Chain Link Truss Rod Holder

The Chain Link Fencing Truss Rod Holder (often referred to as a truss tightener) is an indispensable fitting used to anchor truss rods to terminal posts. This component is central to the structural integrity of any chain link commercial fence, acting as the connection point that allows the truss rod to brace the post against the extreme tension of the stretched fabric. By securely holding the rod, it enables the transfer of mechanical force from the terminal post to the line posts, preventing the "leaning" that can occur over time with improperly braced systems.
