WE LISTEN. WE CARE. WE DELIVER

Galvanized Commercial Roll

Specification Sheet

SPC-CHAIN-021A

Galvanized Commercial Roll

The Chain Link Fencing Galvanized Commercial Roll is a specialized barrier solution designed for facilities requiring a higher degree of security than standard residential mesh provides. This fencing creates an imposing boundary ideal for tennis courts, secure institutions, and commercial properties. The tighter apertures makes the mesh significantly harder to climb, acting as a superior deterrent against intrusion compared to wider weaves.

Key Features

Material Type

Galvanized Steel

Compatibility

The Chain Link Fencing Galvanized Commercial Roll is an essential component of constructing a Chain Link Fence run. The roll is key for structure and aesthetics being supported by posts and tensioning components.

Available Sizing

- Length: 50'
- Height: 4' to 12'
- Gauge: 9ga or 11ga
- Selvage type: Knuckle-Knuckle or Knuckle-Twist or Twist-Twist
- Aperture: 1-3/4" or 2"

Color Options:

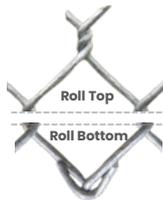

Selvage Type

KK - Knuckle Knucle

- The wire ends at both the top and bottom of the fence are bent over into smooth loops.
- Typically found in commercial usage where safety is priority

KT - Knuckle Twist

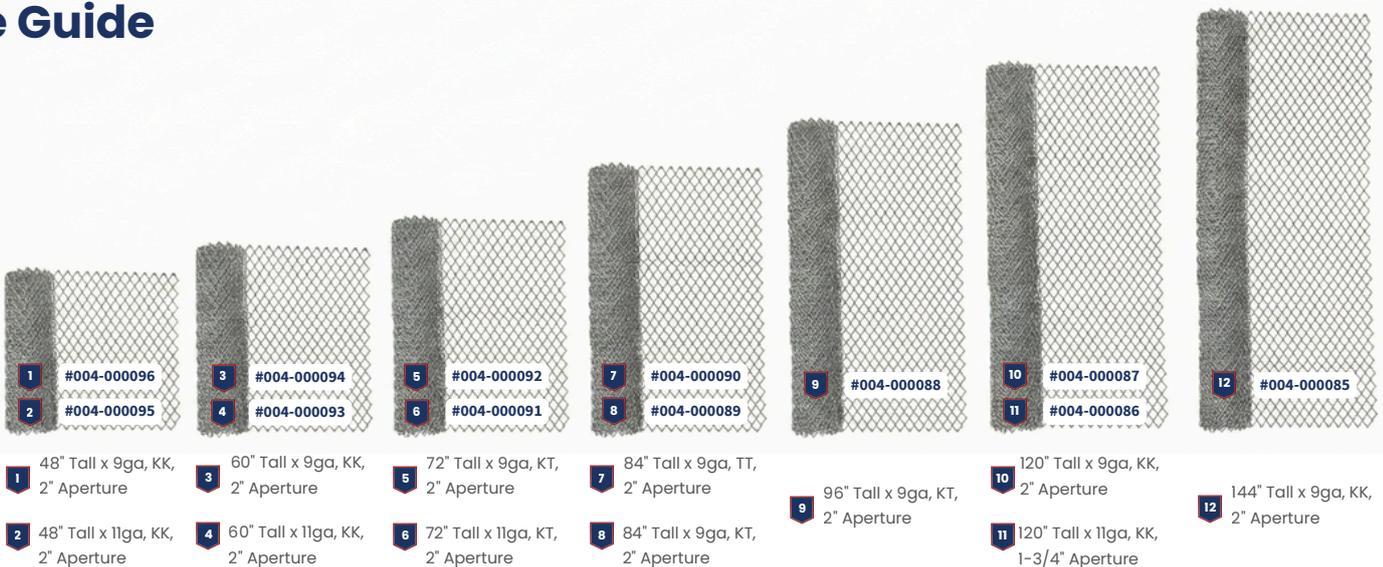

- Hybrid finish where one end is bent into smooth loops and the other, sharp barbs.
- Typically found in commercial usage to provide an extra deterrent to the fence line

TT - Twist Twist

- The wires at both ends are twisted into sharp barbs to make it difficult to climb or crawl under.
- Typically found on high security or industrial applications such as: prisons, airports and military sites
