NewStead Full Privacy Vinyl Fencing & Gates

Specification Sheet

SPC-VINYL-001A

Vinyl Full Privacy Fencing and Gates. Absolute Seclusion. Timeless Durability.

Define Your Sanctuary with Elegance. Our Vinyl Full Privacy Series is engineered for property owners demanding absolute seclusion and a clean, classic aesthetic. Unlike traditional wood fencing, this system utilizes high-grade, UV-stabilized vinyl construction to create a seamless, solid barrier that resists weathering, fading, and rot. Featuring a robust 5-inch profile and deep-set installation posts, it delivers superior structural integrity while maintaining a pristine, maintenance-free white finish for decades.

Key Features

Premium Vinyl Material
High-grade, UV-stabilized PVC resists weathering and yellowing. Requires no painting or sealing, ensuring a pristine finish for years.

Total Privacy
Interlocking panels create a zero-gap barrier. The solid design blocks all sightlines for maximum privacy and asset security.

Structural Rigidity
A thick 5" profile prevents sagging. The heavy-duty construction withstands wind loads and impact far better than standard kits.

Versatile Heights
Available in three standard installed heights (4', 5', and 6') to meet specific zoning and security requirements.

Modular Design
Full range of 5" matching posts (Line, End, Corner, Blank) allows for a seamless professional finish on any layout.

Suitable For

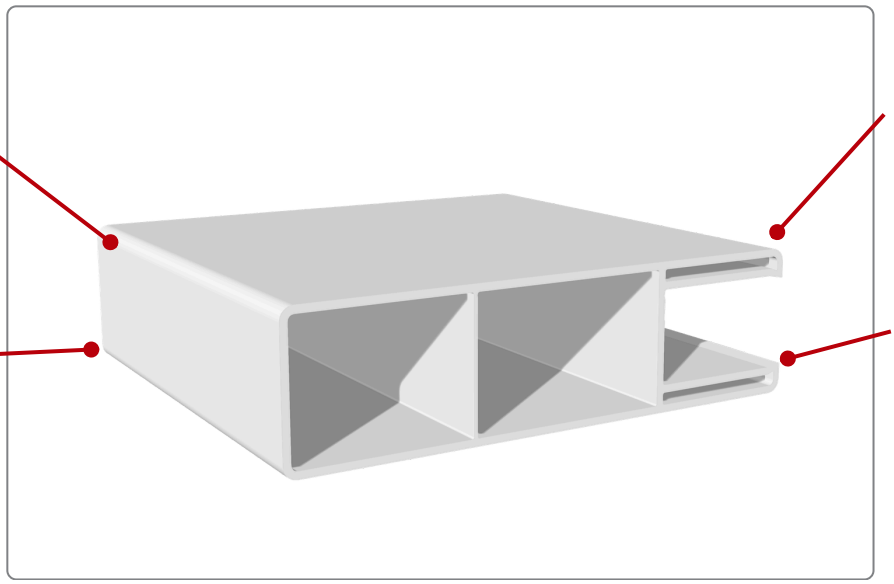
- Residential & HOA Perimeters
- Pool Enclosures
- Dumpster & Utility Screening
- Schools & Day-care Facilities
- Hospitality Courtyards

Engineered for Longevity, Crafted for Sustainability.

First Fence USA's vinyl range represents a breakthrough in material science, combining high-tensile 100% virgin resin with eco-conscious manufacturing. Designed for a lifetime of performance, our panels offer a maintenance-free alternative to wood and metal without compromising on environmental responsibility.

Sustainable Core Technology
Utilizing calcium carbide synthesis rather than petroleum, our oil-free resin is produced through a pollution-free process. This creates a high-strength core that protects natural resources without sacrificing structural integrity.

Superior UV & Weather Resistance
Fortified with 10 parts Titanium Dioxide, our 100% virgin vinyl meets ASTM F964 standards. This advanced chemistry prevents blistering, peeling, and rot, ensuring the product never decomposes into the soil.



Zero-Waste Manufacturing
Our closed-loop system uses injection technology that generates no harmful byproducts. We re-grind all leftover materials and use recycled cooling water to maintain a 100% resource-efficient production cycle.

Maintenance-Free Durability
Eliminate toxic paints and rust treatments. Unlike wood or metal, our high-quality vinyl requires only simple water cleaning, removing formaldehyde risks while saving trees through a superior life cycle.
