FIRST FENCE USA

WE LISTEN. WE CARE. WE DELIVER

NewStead Closed Picket Vinyl Fencing & Gates

Specification Sheet

SPC-VINYL-004A

Architectural Sophistication. Breathable Privacy. Timeless Durability.

The NewStead Series is engineered for homeowners who demand the perfect balance of security and airflow. Featuring a contemporary vertical picket design with a closed top rail, this system utilizes high-grade, UV-stabilized vinyl to create a robust barrier that resists weathering, fading, and rot. Unlike traditional wood fencing, NewStead delivers a pristine, maintenance-free finish built to withstand the elements for decades.

Key Features

- Premium Vinyl Material**
 Our high-grade, UV-stabilized PVC prevents yellowing and brittleness. This maintenance-free system requires no painting, staining, or sealing.
- Balanced Privacy & Airflow**
 The closed-top picket design provides a high-seclusion barrier while allowing natural light and breezes to pass through, reducing wind load on the structure.
- Engineered Structural Rigidity**
 Reinforced profiles prevent sagging over the lifespan of the fence. This heavy-duty construction is built to withstand high wind speeds and impacts far better than standard retail kits.
- Streamlined Modular Design**
 A full range of matching 4-inch posts ensures a seamless, professional look for any yard layout, whether you are navigating corners or ending a run.

Suitable For

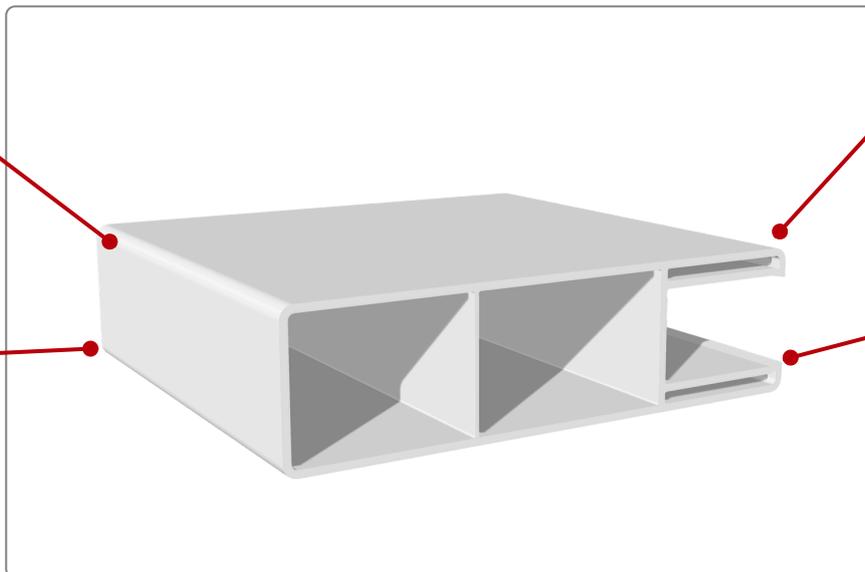

- Residential & HOA Perimeters
- Pool Enclosures
- Dumpster & Utility Screening
- Schools & Day-care Facilities
- Hospitality Courtyards

Engineered for Longevity, Crafted for Sustainability.

First Fence USA's vinyl range represents a breakthrough in material science, combining high-tensile 100% virgin resin with eco-conscious manufacturing. Designed for a lifetime of performance, our panels offer a maintenance-free alternative to wood and metal without compromising on environmental responsibility.

Sustainable Core Technology
 Utilizing calcium carbide synthesis rather than petroleum, our oil-free resin is produced through a pollution-free process. This creates a high-strength core that protects natural resources without sacrificing structural integrity.

Superior UV & Weather Resistance
 Fortified with 10 parts Titanium Dioxide, our 100% virgin vinyl meets ASTM F964 standards. This advanced chemistry prevents blistering, peeling, and rot, ensuring the product never decomposes into the soil.

Zero-Waste Manufacturing
 Our closed-loop system uses injection technology that generates no harmful byproducts. We re-grind all leftover materials and use recycled cooling water to maintain a 100% resource-efficient production cycle.

Maintenance-Free Durability
 Eliminate toxic paints and rust treatments. Unlike wood or metal, our high-quality vinyl requires only simple water cleaning, removing formaldehyde risks while saving trees through a superior life cycle.

NewStead Closed Picket Vinyl Fencing & Gates

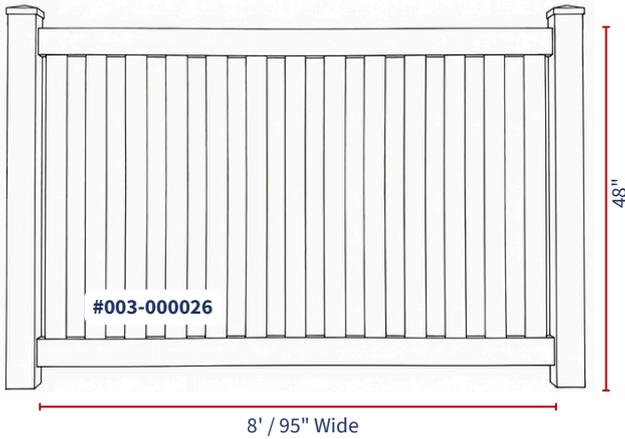

Specification Sheet

SPC-VINYL-004A

Pool Enclosure Safety. Sorted.

NewStead closed picket vinyl fencing provides robust strength and clear visibility for residential and commercial pool enclosures. Its tight-fitting connections prevent tampering and breakage, ensuring safety where it counts.

Closed Picket Fencing Dimensions

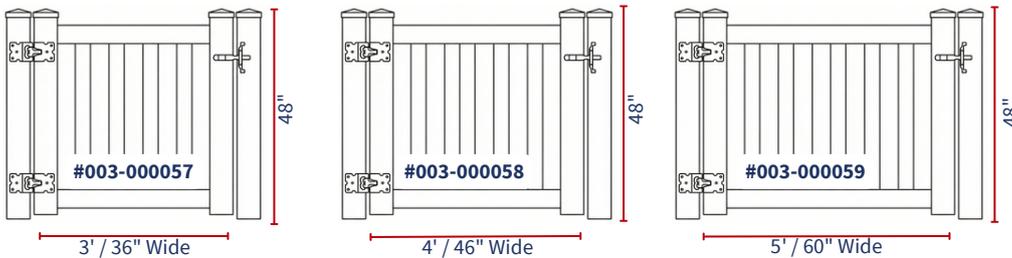

Need to Know:

Each fencing kit includes one line post in the kit. To end a fence run or to create a corner, a separate post must be purchased.

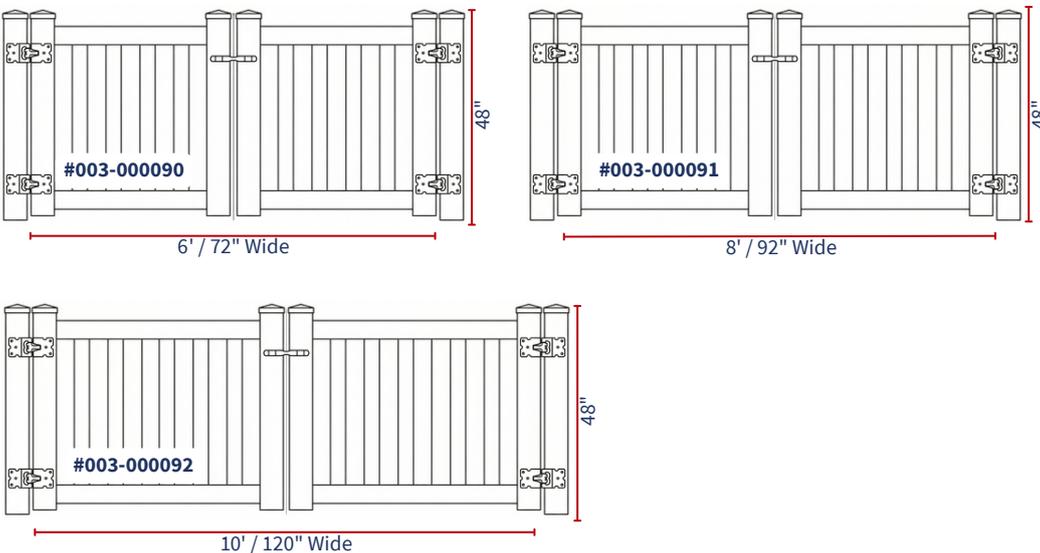

Closed Picket Gates to Suit

Sleek closed picket gates available in a range of widths, designed for a range of access requirements. Sitting at 48" tall, the closed picket gate range blends effortlessly into the fence line, making it look complete.

Walk Gates

Drive Gates

Need to Know:

To ensure your installation goes smoothly, please note that gate posts are sold separately and are not included in the standard fencing kit.

Because every layout is different, you may need "blank" posts (posts without pre-routed holes) to support a standalone gate or to finish a specific run. Purchasing them individually allows you to select the exact post type required for your project's unique configuration.
