NewStead Lattice Privacy Vinyl Fencing & Gates

Specification Sheet

SPC-VINYL-002A

Vinyl Full Privacy Fencing and Gates. Absolute Seclusion. Timeless Durability.

Our Vinyl Full Privacy Series is engineered for homeowners demanding absolute seclusion and a clean, classic aesthetic. Unlike traditional wood fencing, this system utilizes high-grade, UV-stabilized vinyl to create a seamless barrier that resists weathering, fading, and rot. Accented by a decorative lattice panel top, this fence combines style with strength. It features a robust 5-inch profile and deep-set posts for superior structural integrity, delivering a pristine, maintenance-free white finish that lasts for decades.

Key Features

Premium Vinyl Material

High-grade, UV-stabilized PVC resists weathering and yellowing. This maintenance-free lattice panel system needs no painting or sealing to stay pristine for years.

Total Privacy

Interlocking panels create a zero-gap barrier for seclusion, while the decorative lattice panel top adds classic style and airflow without compromising security.

Structural Rigidity

A reinforced 5" profile prevents sagging at the full 6-foot height. This heavy-duty construction withstands wind loads and impact far better than standard kits.

Versatile Heights

The standard 6-foot installed height meets most HOA and zoning codes, offering ideal privacy coverage for your property lines.

Modular Design

A full range of matching 5" posts supports the lattice panel system, creating a seamless and professional look for any layout.

Suitable For

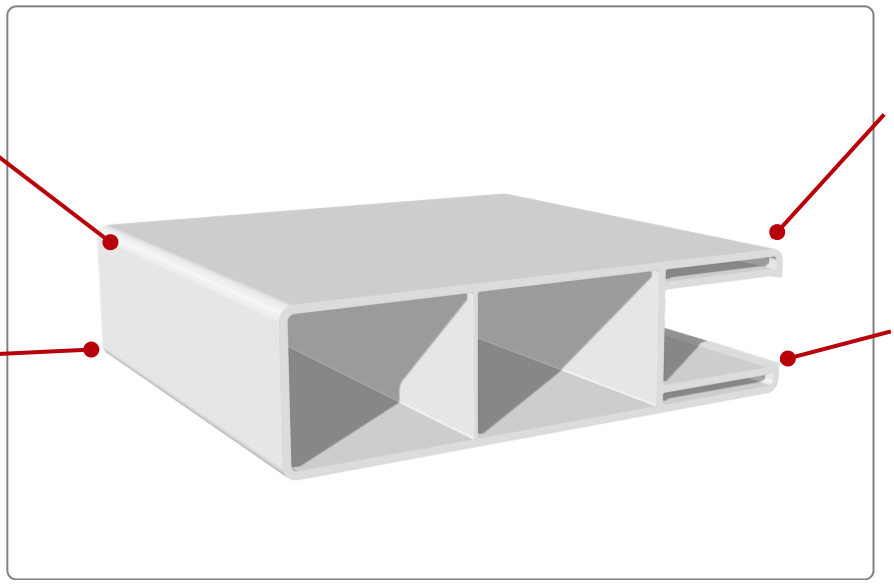
- Residential & HOA Perimeters
- Pool Enclosures
- Dumpster & Utility Screening
- Schools & Day-care Facilities
- Hospitality Courtyards

Engineered for Longevity, Crafted for Sustainability.

First Fence USA's vinyl range represents a breakthrough in material science, combining high-tensile 100% virgin resin with eco-conscious manufacturing. Designed for a lifetime of performance, our panels offer a maintenance-free alternative to wood and metal without compromising on environmental responsibility.

Sustainable Core Technology
Utilizing calcium carbide synthesis rather than petroleum, our oil-free resin is produced through a pollution-free process. This creates a high-strength core that protects natural resources without sacrificing structural integrity.

Superior UV & Weather Resistance
Fortified with 10 parts Titanium Dioxide, our 100% virgin vinyl meets ASTM F964 standards. This advanced chemistry prevents blistering, peeling, and rot, ensuring the product never decomposes into the soil.



Zero-Waste Manufacturing
Our closed-loop system uses injection technology that generates no harmful byproducts. We re-grind all leftover materials and use recycled cooling water to maintain a 100% resource-efficient production cycle.

Maintenance-Free Durability
Eliminate toxic paints and rust treatments. Unlike wood or metal, our high-quality vinyl requires only simple water cleaning, removing formaldehyde risks while saving trees through a superior life cycle.

NewStead Lattice Privacy Vinyl Fencing & Gates

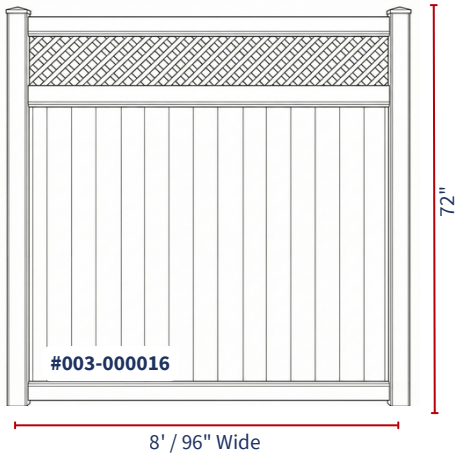
Specification Sheet

SPC-VINYL-002A

Privacy with Style.

When it comes to framing your outdoor sanctuary, we know that every property has its own unique character. That is why the NewStead Lattice-Top collection is designed to blend sophisticated style with reliable boundaries.

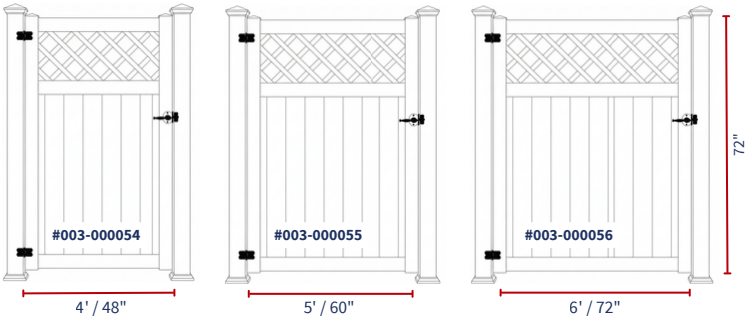
Vinyl Lattice Fencing Dimensions



Need to Know:
Each fencing kit includes one line post in the kit. To end a fence run or to create a corner, a separate post must be purchased.

Vinyl Lattice Gate Sizes

Walk Gates



Need to Know:
To ensure your installation goes smoothly, please note that gate posts are sold separately and are not included in the standard fencing kit.

Because every layout is different, you may need "blank" posts (posts without pre-routed holes) to support a standalone gate or to finish a specific run. Purchasing them individually allows you to select the exact post type required for your project's unique configuration.

Drive Gates
