FIRST FENCE USA

WE LISTEN. WE CARE. WE DELIVER

NewStead Picket Vinyl Fencing & Gates

Specification Sheet

SPC-VINYL-005A

Architectural Sophistication. Open-Air Elegance. Timeless Durability.

The NewStead Series is engineered for homeowners who seek the perfect blend of classic curb appeal and structural integrity. Featuring a traditional open-top vertical picket design, this system utilizes high-grade, UV-stabilized vinyl to create a beautiful boundary that resists weathering, fading, and rot. Unlike wood fencing, NewStead delivers a pristine, maintenance-free finish built to withstand the elements for decades.

Key Features

- Premium Vinyl Material**
 Our high-grade, UV-stabilized PVC prevents yellowing and brittleness. This maintenance-free system requires no painting, staining, or sealing.
- Classic Picket Aesthetics & Airflow**
 The 48-inch high open-picket design provides a clear boundary while maintaining an airy, unobstructed feel. This allows natural light and breezes to pass through freely, significantly reducing wind load on the structure.
- Engineered Structural Rigidity**
 With a robust 4-inch thickness and reinforced profiles, these panels are designed to prevent sagging. This heavy-duty construction is built to withstand high wind speeds and impacts far better than standard retail kits.
- Streamlined Modular Design**
 A full range of matching 4-inch "Dig In" posts (Line, End, Corner, and Blank) ensures a seamless, professional look for any yard layout, whether you are navigating corners or ending a run.

Suitable For

- Residential & HOA Perimeters
- Pool Enclosures
- Dumpster & Utility Screening
- Schools & Day-care Facilities
- Hospitality Courtyards

Engineered for Longevity, Crafted for Sustainability.

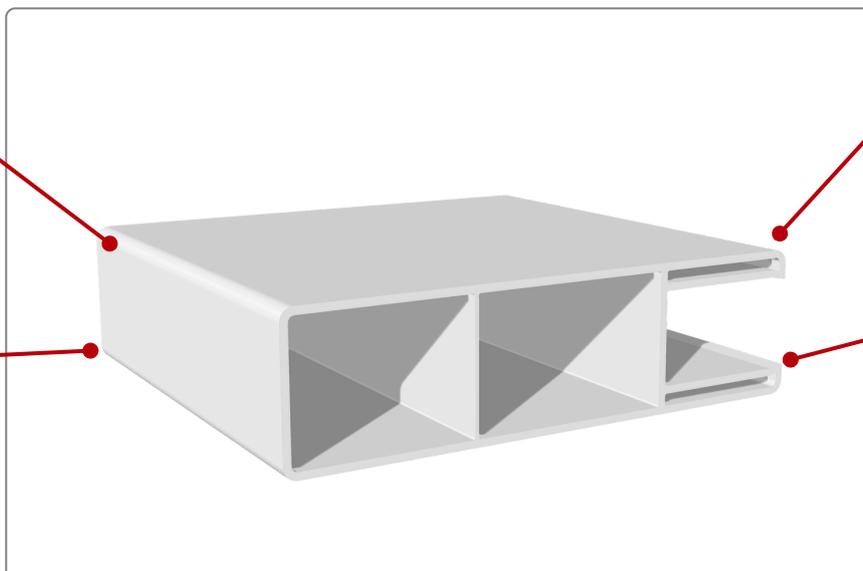

First Fence USA's vinyl range represents a breakthrough in material science, combining high-tensile 100% virgin resin with eco-conscious manufacturing. Designed for a lifetime of performance, our panels offer a maintenance-free alternative to wood and metal without compromising on environmental responsibility.

Sustainable Core Technology

Utilizing calcium carbide synthesis rather than petroleum, our oil-free resin is produced through a pollution-free process. This creates a high-strength core that protects natural resources without sacrificing structural integrity.

Superior UV & Weather Resistance

Fortified with 10 parts Titanium Dioxide, our 100% virgin vinyl meets ASTM F964 standards. This advanced chemistry prevents blistering, peeling, and rot, ensuring the product never decomposes into the soil.

Zero-Waste Manufacturing

Our closed-loop system uses injection technology that generates no harmful byproducts. We re-grind all leftover materials and use recycled cooling water to maintain a 100% resource-efficient production cycle.

Maintenance-Free Durability

Eliminate toxic paints and rust treatments. Unlike wood or metal, our high-quality vinyl requires only simple water cleaning, removing formaldehyde risks while saving trees through a superior life cycle.

NewStead Picket Vinyl Fencing & Gates

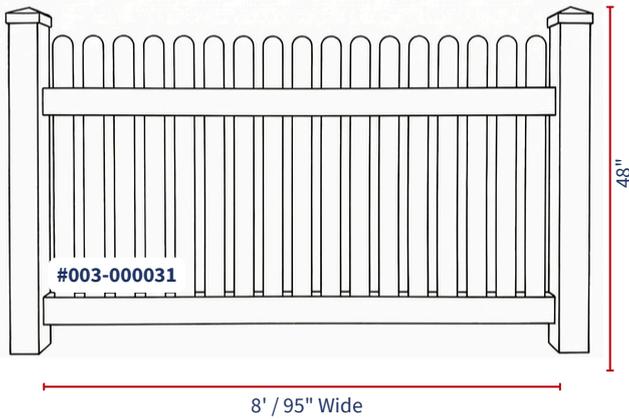

Specification Sheet

SPC-VINYL-005A

Pool Enclosure Safety. Sorted.

NewStead closed picket vinyl fencing provides robust strength and clear visibility for residential and commercial pool enclosures. Its tight-fitting connections prevent tampering and breakage, ensuring safety where it counts.

Picket Fencing Dimensions

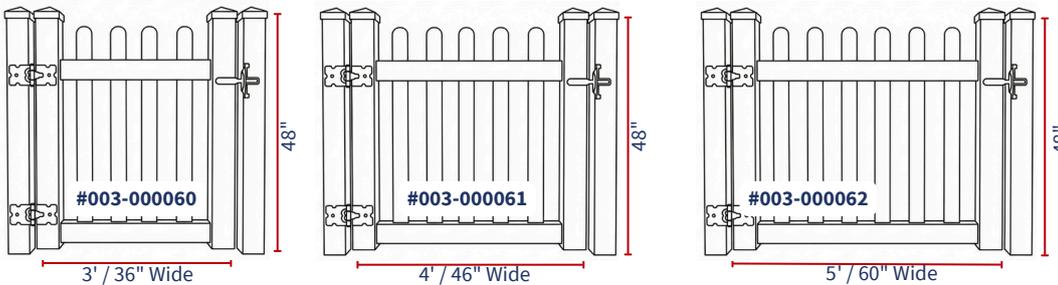

Need to Know:

Each fencing kit includes one line post in the kit. To end a fence run or to create a corner, a separate post must be purchased.

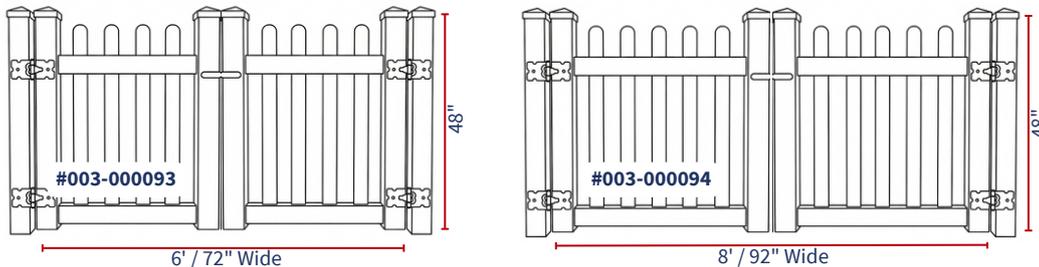

Gates to Suit any Pool

Sleek vinyl picket gates are available in a variety of widths to accommodate diverse access needs. Standing 48 inches tall, these gates blend effortlessly into the fence line to ensure a seamless, professional finish.

Walk Gates

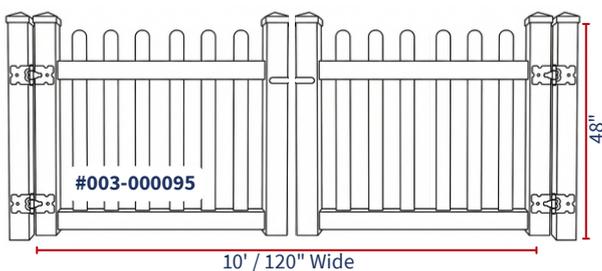

Drive Gates

Need to Know:

To ensure your installation goes smoothly, please note that gate posts are sold separately and are not included in the standard fencing kit.

Because every layout is different, you may need "blank" posts (posts without pre-routed holes) to support a standalone gate or to finish a specific run. Purchasing them individually allows you to select the exact post type required for your project's unique configuration.
