NEW
HARDWIRED

USAutomatic is proud to announce our **NEW** Hard Wired Keypad for AC Powered Systems.

This rugged, metal companion device is weather-resistant and works with all gate openers and electric door locks installed in a hard wired, non-solar environment. Power requirements are 12-24 VAC/VDC power source.

Features Include:

- Rugged die-cast locking aluminum cover
- 1000 access codes - permanent or temporary
- 2-5 digit access code length
- Request to exit input
- Stainless steel blue LED backlit keypad
- Keypad lights are programmable for full time on or only when keys are pressed
- Night light with adjustable sensitivity programmable for full time on, full time off, or twilight sensor
- 2 relays capable of operating for timed activation of 1-99 seconds or for hold open. (maintain contact)
- Keypad locks out for 60 seconds after 7 incorrect access codes
