

Hydraulic Gate Closer

Installs easily, Closes smoothly

SlimLine offers a minimalist, invisible design when mounted vertically behind the gate – perfect for safety and pedestrian gates.

SELF
CLOSES
GATES UP
TO 150kg

Upgrade your self-closing gate installations

- **Accessible for All:** 3D Cam-Motion* Technology enables smooth, secure gate operation – ideal for children, the elderly, and people with disabilities on gates 850mm or wider.
- **Maximum Versatility:** 14 mounting options for gate, post, wall, or rail – vertically or horizontally. Ideal for retrofits with face or centre mounted hinges.
- **Built for Tough Jobs:** Engineered for gates up to 150 kg and 1300 mm wide, with independent latch and closing speed adjustments.
- **Fast, No-Weld Installation:** Complete kit includes fasteners, guide rail, hold-open, and damper for quick, hassle-free setup.
- **All-Weather Reliability:** Durable in harsh conditions, -30°C to +50°C with corrosion-resistant screws and covers.

Suitable for
ADA Use

Self-Closing
Action

No Greasing
Required

*The force of 3D Cam-Motion technology ensures gates are light to open but strong enough to close

Feel the difference with Cam-Motion® Technology

Every user, young or old, can open the gate effortlessly and safely

The DC622G Gate Closer, powered by 3D Cam-Motion® Technology, brings high-end performance to pedestrian and security gates. The DC622G requires less effort to open the gate, ensuring comfortable operation and barrier-free access for all. The closer shuts the gate tight without force. Unlike traditional gate-closing technology, 3D Cam-Motion® does the heavy lifting, so your customers don't have to.

The DC622G with Cam-Motion® delivers smoother gate operation than traditional rack-and-pinion closers. No hard pushing or pulling — just easy, natural movement that's elbow-friendly and ideal for kids, seniors and anyone with limited mobility.
